

MOON LAKE

OUTFITTERS LTD.

HUNTING FOR:

- Dall/ Fannin Sheep
- Mountain Goat
- Mountain Caribou
- Canada Moose
- Grizzly
- Black Bear
- Wolf , Lynx & Wolverine

2009 – ANOTHER SUCCESSFUL YEAR!

NORTH WESTERN BRITISH COLUMBIA, CANADA— Another season with great clients, good crew and fantastic trophies is over. We had one of the hottest summer in memory and it stayed warm and smoky well into August. Everyone was happy when the weather finally started to cool off and the smoke subsided.

Pre-season, we cut out some old trails to pave the way for the horses who were brought into the hunting area for the first time in 20 years. The horses really helped expand the hunting opportunities and discover new hunting ground.

"The abundance of game in the hunting area is just unsurpassed. Every day we are looking at sheep, goats, caribou and just a ton of bears."

Shane

Guide Ryan with Martin's ram

In the fall of 2008 a very large caribou was spotted on two separate occasions. This year Shane found his massive shed caribou antler behind Moon Lake Camp and later saw this impressive bull again. Unfortunately, he was not ground checked this year but maybe he will make it through another Winter....

"Bringing horses into the area definitely opened up some really interesting and productive new hunting areas"

We observed unbelievable bear densities throughout the Fall Season—sometimes up to five different grizzlies a day. Our hunting success was 100 % on grizzly bear and almost everyone had a chance at a black bear.

COOL CRISP FALL SUCCESS

Heinz-Peter M

The moose hunting season started out slow and quiet and the moose never seemed to really get into the rut the way they usually do. However, overall, hunters were successful at taking some very nice bulls. The horses came into their own right during the moose hunting season and really lightened the guides' loads. For next year, we will expand our string of horses and will also improve access and mobility with the installation of floats and ski's on our Bellanca Scout.

Graham Base Camp was definitely the hot-spot for wolves in October. One hunter encountered twelve of the elusive creatures swimming in Tagish Lake and managed to connect with a beautiful, large, blue male. In our opinion, the key to a healthy wildlife population lays in the abundance of both predators and prey.

YOUR OUTFITTERS

Moon Lake Outfitters is a family owned and operated business. Our hunting concession was purchased from Harro and Helga Obst in December of 2008. Harro and Helga operated a very successful guiding business for 18 years, catering to mainly European clients. We are extremely grateful to have the opportunity to carry on their legacy, offering our hunters outstanding service, world class game and the hunt of a lifetime.

Looking forward to our next hunt!
